SUMMARY

AI-native product designer with nearly 3 years shipping B2C and SaaS products end to end: discovery, UX research, product strategy, journey mapping, high-fidelity UI, systems thinking, and design systems. I lead with product thinking and treat AI as an accelerator, moving faster through research, ideation, and prototyping while strategy and design decisions stay mine. “Taste & Critique”. That speed turns ambiguous, workflow-heavy problems into clear experiences that lift retention, engagement, and growth. “Speed without direction leads to divergence.”

EXPERIENCE

Product Designer - Doctiq (Founding Designer) Mar 2025 – Present

Chennai, India · Onsite

- First and only product designer for a clinic-management (EHR) SaaS, built the product from the ground up (dashboard + marketing site) and own it end to end, from research and IA to high-fidelity UI, alongside the founding team.
- Led a recent full revamp to support a new feature set and scale cleanly, restructuring dense clinical workflows (consultation suite, dental charting, AI inbox, analytics) into clearer nested information, uniformity, and accessible patterns for non-technical staff.
- Built a mini design system that keeps the growing product consistent and speeds up design-to-dev handoff.
- Refreshed the marketing site with a glassmorphism visual language, micro-interactions, and motion, while keeping the dashboard clean and function-first, matching each surface to its purpose.
- Work directly with the founding team to scope, prioritise, and ship on a lean timeline. The redesigned product is now onboarded by **2 clinics and 1 hospital**, with **2 more** in the pipeline.

Founder & Creative Head - Modent Me Nov 2025 – Aug 2026

Chennai, India · On-site

- Founded and run a creative studio delivering brand, social, video content, leading strategy, scripting, direction, design, and delivery.
- Own full client relationships end to end: scoping, contents, timelines, and final delivery for 3 clients.
- Built an AI-augmented production workflow (Claude, ChatGPT, generative image/video tools) to speed ideation, content, and creative output.
- Expanded my range from screen design into brand identity, motion, and video direction.

Product Designer - Strawberry Infotech (Client - Wall Street English) Jul 2024 – Feb 2026

Chennai, India · Hybrid

- Owned design for core learner-facing areas of a global EdTech platform (15+ countries), influencing roadmap, release sequencing, and UX strategy.
- Led an end-to-end mobile app revamp, UX research, competitive analysis, and high-fidelity prototypes delivering a beta that improved task-completion speed.
- Redesigned onboarding and class-dashboard experiences: cut onboarding time **13%**, reduced dropouts **19%**, and lifted class bookings **7%**.
- Built and maintained a mobile + web design system on Atomic Design principles, speeding developer handoff and keeping releases consistent.

Product Designer - Swimingo (Freelance) Apr 2024 – Aug 2024

Remote

- Led the full rebrand from SwimNGo to Swimingo, new visual identity and design system for a D2C SaaS platform serving swim academies.
- Drove UX and data-informed improvements that increased user retention **~90%** and daily active users **15%**.
- Ran A/B tests, design sprints, and stakeholder workshops that lifted user satisfaction **40%**.

UI/UX Designer - Ducima Analytics (Freelance) Nov 2023 – Aug 2024
Chennai, India

- Designed web and mobile experiences for an internal financial-operations platform, travel-spend management, multi-step approvals, and expense visibility.
- Simplified booking and approval-routing workflows with the product owner, reducing friction and improving task-completion speed.

Associate Software Technologist - CES Mar 2022 – Jul 2023
Chennai, India

- Built user-facing frontend interfaces alongside designers and engineers, cross-functional exposure that led into full-time product design.

SKILLS

Design: UX research · journey mapping · information architecture · interaction design · wireframing & prototyping · high-fidelity UI · design systems (Atomic Design) · usability testing · accessibility (WCAG)

Product: product discovery · JTBD · A/B testing · funnel & retention optimisation · MVP definition · roadmap input · stakeholder alignment

AI-augmented design: Claude · ChatGPT · generative image/video tools · AI-assisted research, ideation & production

Collaboration: cross-functional delivery · design documentation & handoff (Figma Dev Mode) · Agile · client & stakeholder management

TOOLS

Figma · Adobe Creative Suite · Framer · Miro · Notion · Jira · Dovetail · Maze · Hotjar · Google Analytics · Claude Code · Claude Design · Gemini · Codex · ChatGPT & AI-assisted tools

EDUCATION

B.E. Computer Science and Engineering - R.M.K. College of Engineering and Technology 2018 – 2022
Chennai, India · CGPA 8.21 / 10
